

Team 2 - Sprint 1 review report

(Miro, Michael, Saeid, Farnaz)

What has been done already:

- we have already created Trello and populated it with Product Backlog & Sprint Backlogs
- We divided tasks between us for 4 Sprints and assigned the tasks of the first sprint to the team members. We have also set the deadlines for our tasks to be completed.
- We have already done the Project Plan and Product Vision. Both documents were submitted in Moodle by the first sprints scrum master.
- We have developed an UI Blueprint for the application with Figma.
- Project repository and version control have also already been set up.

What is in progress:

- We are getting ready to start the developement of the application:
- Our coding roles are clear and will not be changing, but the scrum master changes in each sprint.
- We have managed to set up Jenkins and Docker to our own computers, and we are getting ready to use them also in our project.
- We will start the development of the frontend and backend of the app soon during sprint 2, and also during sprint 2 we will try to get the core functionalities of the app functional.
